

Gas Managed Learning Programmes (MLP)

Here at ATC we are approved to deliver ERS Managed Learning Programmes which comply with the requirements of IGEM/IG/1 Standards of training in gas work. ERS has developed these programmes to assist New Entrants into the gas industry.

On successful completion of the training, portfolio and assessment, candidates who are issued with an ERS Managed Learning Programme certificate can then apply to undertake relevant ACS assessments which are recognised by Gas Safe Register for registration purposes.

The entry routes available are as follows:

- Domestic Gas Safety (D1)
- Domestic Meter Installers Gas Safety (DMI1)

Training modules covered within the various programmes include:

- Safety, Legislation and Standards
- Gas Emergency Actions and Procedures
- Products and Characteristics of Combustion
- Ventilation for Domestic Gas Burning Appliances
- Installation of Pipework and Fittings
- Tightness Testing and Purging
- Checking and/or Setting Meter Regulators
- Unsafe Situations & Emergency Notices
- Emergency Isolation Controls and Valves
- Appliance Burner Pressures and Gas Rates
- Appliance Gas Safety Devices & Controls
- Chimney Standards
- Chimney Installation, Inspection and Testing
- Re-establish Gas Supply & Re-light Appliances
- Domestic Cooker Installation & Servicing
- Domestic Fire Installation & Servicing
- Domestic Boiler Installation & Servicing
- Domestic Air Heater Installation & Servicing
- Domestic Meter Installation
- Testing Appliance Pipework Connections

Anglia Training Centre

The programmes are suitable for:

- New Entrants WITHOUT Experience or Qualifications
- New Entrants WITH Relevant Experience or Qualifications

New Entrants WITHOUT Experience or Qualifications:

- you will be new to the gas industry and will be without a recognised qualification or experience
- you will be required to undertake onsite training and provide work-based portfolio of evidence gained under the supervision of a Gas Safe Registered installer
- you will be required to undertake training at an ERS Approved Centre
- you will be required to complete MLP assessments

New Entrants WITH Relevant Experience or Qualifications will:

- you will hold a recognised qualification in the mechanical services engineering sector
- you will be required to undertake onsite training and provide work-based portfolio of evidence gained under the supervision of a Gas Safe Registered installer, along with submission of evidence of experience gained which should detail precisely the type, range and volume of gas work carried out
- you will be required to undertake training at an ERS Approved Centre
- you will be required to complete MLP assessments
- your training and onsite evidence may be reduced depending upon qualifications held and experience evidence submitted, this will be discussed during a technical interview at the centre

Depending upon the entry route and chosen programme, the duration of the MLP will be a minimum of 6 months and will require attendance at the centre along with gaining and documenting onsite experience under the supervision of a Gas Safe Registered engineer.

The prices are:

D1 Core Gas, Boilers and Cookers - £3800+VAT

Additional appliances - £250+VAT

To book your place and make a payment follow this [Link](#)

ACS course will then be required at extra cost to enrol on the Gas Safe register. For more information follow this [Link](#).

This information is intended to provide an overview of the scheme. For further details of cost, duration, and availability, please contact Michele Wilson on 01553 815600 or email us at atc@cwa.ac.uk
